

## YOUR PARTNER IN SUCCESS

In order to meet our high company standards, we will only give our partners the best manufacturing and engineering service based on our idea of R-E-A-L (Reliability, Efficiency, Affordability, and a Lasting-Relationship).

**Reliability:** We offer the highest level of quality with our services and promise you an on-time project delivery, working together with you to solve all problems quickly and efficiently.

**Efficiency:** Our highly efficient manufacturing process, centered our computer-controlled CNC machine, produces materials precisely and quickly.

**Affordability with Quality:** Our affordable yet top-notch products are manufactured from the best raw materials from around the world.

**Lasting Relationship:** We commit ourselves to be the first, best choice for machinery engineering and are ready to work and grow together in partnership with our customers.

Real focuses on building a strong partnership with our customers as well as developing our own people. By delivering REAL quality products and services, via the hands of great people, Real ensures success for both of our teams.

**Have a REAL partnership, and achieve REAL success.**

Founded in 2007, Real Soluplus Company Limited (REAL) began using its machinery, fabrication department, and welding expertise to serve major industries such as die and mold manufacturers, high-precision machinery parts operations, the rubber industry, steel mills and most critically, the sugar industry. Real, which is located in Bangpra, Sriracha, Chonburi in Eastern Thailand, only an hour and a half away from Bangkok, currently has 300 experienced and knowledgeable employees working within a large workshop space of 16,000 square meters. Our company is focused on developing our people to respect diversity, cherish teamwork, and to strive for success.
